

# Sancho

**In September of 2019, we picked up Mr. Sancho as a foster pup for DRC thinking he would stay with us temporarily and then find a forever home like the other fosters we had before him. After spending time getting to know him, we fell in love and he became a welcome addition to our family. He spends most days playing or napping with his sister dogs, Dory and Georgie, and he sometimes gets to play with other foster dogs that come to stay with us. Sancho loves his people, cheese, and cuddles. He brings so much joy to our family and friends and everyone that meets him. We are excited to spend many more lazy, cuddly years with our buddy.**

Cuddles and naps with my family... can it get any better than this?
