

Tokasa

(Aka Kenny)

It was kind of spur of the moment when I decided to start looking to adopt another dog. I received a reluctant go ahead from my husband. Our current dog is twelve years old and I had adopted her from Dalmatian Rescue in December of 2006. I saw Tokasa (AKA Kenny) on the site and decided to check him out even though he was puppy age, a little younger than I was considering. He was very adorable but had lots of energy!!! My husband liked him immediately and Tokasa was very affectionate. Introducing Tokasa was purely household chaos and an absolute shock for our cats. However, my husbands' excellent training and family adjustment helped Tokasa settle into our routine and become a loving family member. One of our cats lost a 1.5 pounds playing with Tokasa. Nothing else had worked to help him lose weight. We are very happy he came into our lives. Here is a picture of Tokasa with Cassi lying behind him.
